

Sabai Rebranding

Company has now unified existing service brands into a single name

Saint Louis, MO – June 6th, 2024

Sabai announced today the uniting of their existing subsidiary service lines of Castle IRB, CBS IBC, and Shield Consulting under the single named organization of Sabai. This change allows clients to access the full suite of Sabai services through one mechanism rather than three subsidiaries. Accessing these services through one named organization provides a seamless, productive, and positive service with the ease of streamlined contracting and single point of contact.

Bringing our existing subsidiaries together is the next step in Sabai's continuing growth strategy. Along with the prior acquisition of Alpha IRB, announced in January 2024, Sabai's growth has been expanding to meet client needs and requests while continuing to deliver great service and support.

About Sabai

Sabai IRB Services provides quality-driven, personalized ethical reviews for multi-therapeutic research through its AAHRPP-accredited IRBs. The Sabai IBC team provides expert IBC Reviews for all indications involving cell and gene therapy clinical trials as a central IBC and through Concierge support to local IBCs. We lead with science and differentiate with service.
